

README: Automated Redistricting Simulation Using Markov Chain Monte Carlo

Benjamin Fifield* Michael Higgins[†] Kosuke Imai[‡] Alexander Tarr[§]

December 22, 2019

1 Primary Structure of Replication Archive

This archive contains replication materials for “Automated Redistricting Simulation Using Markov Chain Monte Carlo” (forthcoming, *Journal of Computational and Graphical Statistics*). There are two primary folders — `paper`, and `appendix`.

Each folder within `paper` and `appendix` contains materials to replicate a specific figure. Each folder contains a primary R script to replicate the results, labelled `fig[number].R` for the main paper and `fig_s[number].R` for the appendix, which corresponds with the figure number. Other folders and code files include other dependencies or materials for that particular figure.

2 OS, R, and Package Version Information

```
> sessionInfo()
R version 3.6.0 (2019-04-26)
Platform: x86_64-apple-darwin15.6.0 (64-bit)
Running under: macOS 10.15.1

Matrix products: default
BLAS: /System/Library/Frameworks/Accelerate.framework/Versions/A/Frameworks/vecLib.framework/Versions/A/libBLAS.dylib
LAPACK: /Library/Frameworks/R.framework/Versions/3.6/Resources/lib/libRlapack.dylib
